

#### Student Evaluation of Instruction Results - SPRING 2015

(MCHE) - Mechanical Engineering

Dear Joshua E Vaughan:

This form contains evaluation results for MCHE470-006.

The first section of the report contains student reported demographic information. The second part of the report shows the student responses to the quantitative questions. For each question, the number of students (n) who responded, the average or mean (av.), the median (md), and standard deviation (dev.) are displayed. The third part provides a profile of the student responses to the qualitative section of the evaluation. The report concludes with a compiled list of all student open-ended comments regarding the course.

Please note Adobe Acrobat Reader must be installed on your computer in order to view the files.

If you have any questions, please contact Institutional Research at courseevaluation@louisiana.edu or 482-6863.

Ellen D. Cook, Assistant VP for Academic Affairs, Academic Resources and the Office of Institutional Research

#### Comments Report

Before completing this survey please verify the <u>course</u> and <u>instructor</u> information listed above. Once you submit an evaluation, you <u>cannot</u> remove or edit your comments.

If you marked "Other" in the question above, please list the activities and resources required of students in the space below.

Individual and group meetings

Please provide any comments about the course or instructor in the space below, including ways to improve instruction.

I feel as though this class has prepared me for graduate school and working independently under an advisor.

I'm glad I was able to do this Independent Study with Dr. Vaughan. He was definitely involved with the project and cared about it, which made working under him much more stress-free and enjoyable.
I feel like I learned the application of many new things with this course. I learned how to program with Python, how to set up and operate a mobile robot, how to design and build a robotic arm properly, and several controls applications. I also was able to practice presenting my project and writing a conference paper.
